

# Website Categorization & Descriptions

## TPOT SPOTLIGHT (Personal Developer Sites)

**haruu.me** - Personal portfolio for Haru, CS student interested in competitive programming, ML, art, and chess. Building: Solana wallet in Rust, gamified Japanese learning site, privacy-focused chat app, bookmark storage platform. Startup aspirations. Contact: [kawkoi@proton.me](mailto:kawkoi@proton.me)

**liminallogs.bearblog.dev** - Personal blog titled "Liminal Logs" with posts on digital tools, mathematics, philosophy ("A Rebel, A Religion, A Roadway"), and technology contemplation

**nodes.tools** - nodespaghetti's Blender resources site hosting addons, Python scripts, and Mantis component pack. Supports via Gumroad/Patreon/Locals. GitLab repo available. YouTube channel for tutorials.

**strwb.com** - Playful strawberry-themed micro-project collection by @strwbcom. Features: /tools (indie tech spotlight updated daily), /canvas (infinite canvas for brainstorming), /breathe (relaxation circle), /dvd (bouncing fruit emojis), /wikipedia (random articles), /swearjar (track profanity), /confetti, /reaction (reflex test). Philosophy: "simple projects that drive growth"

**virpy.dev** - Personal portfolio for infosec analyst (/v3:r.pi/) interested in reverse engineering, malware analysis, and security auditing. Building @joinbrag and @usefenced projects. Located at @joinbrag and zone virpy.dev

**0x0001.cc** - Madmeg's technical blog covering: engineering best practices, low-level programming languages, mathematical problem-solving (Advent of Code with formulas instead of code), geometry enthusiasm ("why circles are the best form of geometry"). Includes collaborative circle-drawing tool.

**swagsilver.github.io** - Terminal-style personal page (@swagzo). Links to GitHub, Twitter (X), Lidraughts, Monkeytype, and Discord. Minimalist aesthetic with command-line interface design.

**bohemianhacks.github.io** - GitHub portfolio: "Practical Engineering for Impractical Ideas". 70 repositories including swarm intelligence (ESP32/TensorFlow), PodGet (podcast grabber), programming coursework. Collaborative cryptocurrency projects (Doge\_Blaster).

**shunyaresearch.github.io** - Student-led research lab focused on: (1) **Cognita**: Transformer-alternate AI architectures using bio-mimicry and neuro-symbolism for genuine conceptual understanding beyond token prediction. Review paper coming on AI shortcomings. (2) **Mantis**: EEG-based brain-computer interfaces for cybernetic prosthetics (brain-controlled arm for team member with congenital limb difference), ADHD applications, affordable BCI for Indian market. Accepting donations.

**sakurajimalover.dev** - Matthew (MMatt14), junior web developer in Philippines. Political Science degree pivot to tech. Projects: Mailify (YouTube extension replacing thumbnails with Seishun Buta Yarou character), Seiyuufind (reverse search for Japanese voice actors), Romanilyzer. Tech stack: HTML/CSS/JS, learning Postman/Node/React/MongoDB/Python, planning TypeScript/PostgreSQL/FastAPI/Docker/Go/C#/Rust. Uses VSCode and JetBrains.

**resorcinolworks.tech** - Minimal portfolio for Ayush Raghuvanshi (Resorcinol), pre-final year CS student. Specializes in algorithm thinking and backend development.

**itsk3v.in** - Kevin Roosey, design-focused frontend engineer specializing in AI-native interfaces (artifacts, streaming UI, tools). Loves running and cycling for exploration ("expanding my map"). Open to full-time in-person roles in SF/NYC/Chicago/Seattle. Contact: [kevin@itsk3v.in](mailto:kevin@itsk3v.in)

**kreyon.in** - Vikas (@kreyon), 3rd year BCA student at LPU, fullstack developer and problem solver. Extensive projects: RAG-based CLI for PDF chat with embeddings/LLM, Zomato clone, Discord utility bot (job scraping from Wellfound, GitHub codebase workflow diagrams), 100xDevs Discord Rich Presence extension, meme-only social platform, AI cover

letter generator, real-time multiplayer Tic Tac Toe, passport photo compliance checker with Face API, Eatopia Android food delivery app.

**shank03.com** - Shashank Verma, CSE grad from MNNIT Allahabad, systems programmer ("only fw systems programming language btw"). Experience: SDE at Konrad Group (2025-current), Full Stack Engineer at SuperAlign (2024-2025), Security Engineer Intern at Expedia Group (2023). Languages: C, C++, Go, Rust, Swift, Java, Kotlin. AOSP maintainer for Sony Xperia XZ1 Compact (lilac). Notable projects: XOR Cryptor CLI, StatsBar (macOS M3/M4 system stats), Claw Vault (sensitive info sharing platform), MotiClubs (campus collaboration), Flip-to-Shush Android app, Rubik's Cube Solver with CV.

**projects.priyavkaneria.com** - Massive project showcase: ātmán (Adaptive Topological Muscle-Actuated Network - spatially aware neural network mimicking human brain), Conway's Game of Life experiments, local Android password manager, automated song analysis/mixing, location-based web chat, SuperAlign.ai (AI Governance/Risk/Compliance startup), campus RPG with quiz management, GitHub/GitLab stats analyzer, COVID-19 awareness RPG (DevJam2021 winner), collaborative paint app (NextJS/Socket.io), decentralized disaster donations platform, 1-to-50 Game automation with Tesseract OCR, 20-20-20 eye health reminder, CTF challenges, Rust/WASM Game of Life implementation, plus dozens more education and web projects.

**compiledthoughts.pages.dev** - iOS app portfolio. Featured: "App of the Dead: Afterlife" - gamified learning about world religions' afterlife beliefs using local MLX LLM technology, offline AI, XP/achievements system, interactive quizzes. Available on iOS App Store.

**daelon.dev** - Technical blog covering: Python decorators (classproperty), NiceGUI (social previews, dialog lifecycles), embedded systems (firmware configuration code generation in C/Python), Git worktrees workflow tips. Focus on elegant code organization and embedded development.

**dustinbrett.com** - **daedalOS**: Fully functional Windows 10 clone desktop environment running in browser. Built with React/Next.js over 13 months. Features: start menu, dynamic wallpapers, command-line terminal, video player, 3D Breakout game, Markdown viewer, browsers, file management. Philosophy: visitors feel like they've logged into his computer browsing files (blog posts, pictures). 12k+ GitHub stars. Monthly YouTube updates. Author: Dustin Brett, Self-taught Senior Software Engineer at Coinbase.

**johnconnection.neocities.org** - Personal Neocities page: "good morning usa". C programmer working on jcwmm (custom window manager using Xlib). Declining Java skills from disuse. Interests: coding, working out, cars. Email: [johnconnection@keemail.me](mailto:johnconnection@keemail.me) with privacy assurance.

**paveldogreat.github.io/WebGL-Fluid-Simulation/** - Interactive WebGL-based real-time fluid dynamics simulation running in browser. Advanced computational fluid dynamics visualization with mouse/touch interaction. High-performance GPU-accelerated physics simulation.

**github.com/vibe-meister/DIM-Mathematics-Implied-Magnetism-** - Mathematics/magnetism research project

## OTHER PERSONAL SITES

**not.life** - Suspended by owner: "nothing here anymore, babes. no more time left for personal projects, inundated by work contract. maybe sometime in the future when I'm retired I'll let this resource live again."

**alexanderrob.com** - Alexander Rob, fantasy author portfolio. Books: "Land of the Ill-Imagined" (thoughtlings in purgatory of forgotten ideas), "There Will be Thousands" (bandit sold into slavery), "When The King Was Born" (princes defying king to save mother).

**Beckettoliphant.com** - Personal website mentioned in notes as having "cool content". Unable to access due to robots.txt blocking.

# PROFESSIONAL / BUSINESS

**Bravoapps.dev** - Shopify app development focused on merchant solutions. Building powerful tools for e-commerce, particularly shoppable blog posts with AI-powered suggestions, product embedding, and SEO optimization.

**BohemianHacks** - (See GitHub Pages section above)

**tsotchke.net** - TSOTCHKE CORPORATION. Retro Windows 98-styled website with desktop interface. Features: Corporate X account, README, Computer, Quantum Encyclopedia, Research Papers, Chat Room, Quantum RNG, Winamp player. Mascot: Tsotchke-chan. Time display shows 3:56 AM.

**wisk.cc** - Open-source Notion alternative: "Your Workspace, Built Your Way". Features: flexible block system, complete formatting control (bold/italic/strikethrough/underline), Neo AI assistant, charts/LaTeX/graphs support, LaTeX-powered document export, 40+ themes (customizable), real-time collaboration, tasks/calendars/kanban boards via plugins, community-driven development (GitHub: sohzm/wisk). Templates available for quick starts.

**meteora.ag** - Solana DeFi protocol building "the most secure, optimized & composable yield layer on Solana." Dynamic liquidity infrastructure featuring: DLMM (Dynamic Liquidity Market Maker) with customizable liquidity curves and concentrated capital efficiency, Dynamic AMM Pools, Alpha Vault (anti-bot protection), dynamic fee adjustments based on volatility, multi-token stable pools for low-slippage stablecoin swaps. Native MET token for governance. LP Army community movement. Integrates with Jupiter, Kamino, Hubble. Developer tools: Quick Launch, Metsumi CLI assistant, comprehensive documentation.

**linktr.ee/SOL\_Decoder** - SOL Decoder: Solana NFT trading tools suite. Platform developed with React (frontend) and Node.js (backend), utilizing Firebase, Redis, Discord bot, Twitter API. Features: NFT discovery for new mints, hype tracking for existing collections, wallet functionality, Magiceden.io integration (buy/sell/mint/manage tokens), Algolia-powered fuzzy search. Built on Solana blockchain for fast, scalable transactions. 4,000 NFT supply at 1.9 SOL mint. Active Discord community. Website: soldecoder.app

**dioxuslabs.com** - Dioxus Labs, Rust-based fullstack crossplatform app framework. Better alternative to Electron and React Native for building native apps (mobile, desktop, web). Mentioned by user as recommended alternative with Tauri for modern app development.

**v2.tauri.app** - Tauri v2, native app framework for desktop/mobile using web technologies. Recommended alongside Dioxus as superior to Electron. Security-focused, smaller bundle sizes, Rust backend.

# SOCIAL / COMMUNITY

**ircnow.org** - IRC network community

# WAYBACK MACHINE GEMS

**CAMERONSWORLD** - Archived geocities-style website (Wayback Machine)

**FRIGHT.COM** - Archived horror website (Wayback Machine)

# RANDOM / FUN SITES

**watching-grass-grow.com** - Novelty site (likely exactly what it sounds like)

**thebestdinosaur.com** - Novelty site

**iamawesome.com** - Affirmation/novelty site

**hasthelargehadroncolliderdestroyedtheworldyet.com** - Humorous CERN/LHC status checker

**pointerpointer.com** - Interactive site that finds images of people pointing at your cursor

**cat-bounce.com** - Physics toy with bouncing cats

## USEFUL TOOLS

### Development Tools

**cursor** - (AI-powered code editor - not a URL)

**github** - (Platform - not specific URL)

**brandsnag.com/social-media-handle-checker** - Tool for checking social media handle availability across platforms

**dnschecker.org** - DNS propagation checker and troubleshooting tool. Example usage: checking A records for domains like eosyn.net

**x-graphs.com** - Twitter/X analytics and graphing tool

**brentg's site** - Mentioned as TBD, waiting for specifics from @justme

### Educational / Analysis Tools

**opensourcephysics.github.io/tracker-online/** - **Tracker**: Free JavaScript-based video analysis and modeling tool from Open Source Physics. Features: manual and automated object tracking with position/velocity/acceleration overlays, video filters, line profiles for spectra/interference analysis, dynamic particle models for comparison with real-world videos. Designed for physics education but widely used across fields. Full help documentation available.

**regex101.com** - Real-time regex explanation and testing. Generates explanations as you type. Supports: PCRE2 (PHP $\geq$ 7.3), PCRE (PHP $<$ 7.3), ECMAScript, Python, Golang, Java 8, .NET 7.0 (C#), Rust.

## GLOBAL MONITORING TOOLS

**windy.com/-Waves-waves** - Advanced weather visualization focusing on waves, wind patterns, precipitation, temperature. Interactive global map.

**flightradar24.com/data** - Real-time flight tracking with aircraft positions, routes, and flight data worldwide.

## REPOSITORY / LIBRARY / DATA TOOLS

### Data Exploration & Visualization (from document notes)

1. **RAWGraphs** - Open-source, browser-based data viz framework using D3.js (SVG export, customizable)
2. **Argo Lite** - In-browser graph explorer for interactive network analysis
3. **DataMap** - Browser-based tool for PCA, t-SNE, heatmaps; generates reproducible R code
4. **BioFabric** - Visualize large networks with nodes as lines, edges as columns
5. **Voyant Tools** - Text-analysis suite: word frequencies, context, embedding panels in sites
6. **Autoplot** - Web-based plotting of heliophysics and Earth science datasets
7. **Crossfilter** - JS library for real-time filtering on multi-dimensional datasets
8. **Tangle** - Interactive live computation charts; tweak values, see updates
9. **Modest Maps, Leaflet, Polymaps, OpenLayers, Kartograph** - Lightweight to full-scale JS mapping libraries

10. **Timeline.js** - Open-source timeline creation pulling media from social feeds
11. **Datawrapper** - Free plan for clean newsroom-style charts/maps

## Open Data & API Platforms (from document notes)

12. **GDELT** - Massive global events/demographics/open dataset with visualizations
13. **Libraries.io** - Dataset of 25M+ repos and 85M+ dependencies in open source
14. **UCI ML Repository** - Hundreds of classic datasets (wine, forest, car, etc.)
15. **Data is Plural** - Weekly curated spreadsheet of obscure yet useful datasets
16. **Data.world** - Social dataset collaboration platform with cataloging & insights
17. **Open Data Network** - Aggregates government datasets with simple search UI
18. **Enigma Public Datasets** - Clean interface over public data with visualization tools

## Specialized Domain Tools (from document notes)

19. **Webknossos** - Browser platform for annotating large 3D neuroscience/EM datasets
20. **PathVisio** - Java-based biological pathway editor & analysis tool
21. **Tropes Zoom** - Semantic desktop engine for thematic text grouping (1994)
22. **BetterWorldFlux** - Interactive UN data viz platform (MDG indicators)
23. **Wikirank** - Tracks Wikipedia pageview trends, comparatives over time
24. **FreeDive** - Turn Google Sheets into interactive, filterable web databases
25. **Tag Crowd / Wordle Cloud** - Tag-cloud generation tools

## Creative & Media Tools (from document notes)

26. **Visualizing.org** - Playground for data visualization, community-submitted plots
27. **DivineComedy.digital** - Scrollable Dante visual art meets poetic data viz
28. **Vuvox** - Create multimedia data slideshows (images, audio, video)
29. **Newsmap** - Real-time news visualized in customizable mosaic
30. **WeFeelFine** - Emotional data captured live from personal blogs
31. **Zoetrope Project** - Archive + interactively compare past web element versions
32. **InMaps / Touchgraph** - Visualize LinkedIn/website link networks
33. **Many Eyes** - IBM's experimental public data viz environment

# UNDER CONSTRUCTION

The following sites are placeholders, don't resolve, or couldn't be accessed:

**cyb3r17.space** - Domain doesn't resolve (site may be down or moved)

**cleverloon.games** - Minimal placeholder site with just title, appears to be under construction

**temidara.dev** - Domain doesn't resolve

**rian.is / rian.ring** - Multiple Rian-related search results appeared, unclear which personal site user intended

**melqtx.tech** - Domain doesn't resolve

**rinkit.tech** - Empty/placeholder portfolio for Rinkit Adhana. Under construction.

**skewuo.com** - Domain doesn't resolve

**saltystoic.com** - Unable to fetch (robots.txt issues)

**davidwebstar.com** - Empty page (David Webster)

**Beckettoliphant.com** - Blocked by robots.txt, unable to access

**Qchains.io** - Domain doesn't resolve

**demod.ltd** - Unable to fetch (unknown error)

**oxiuz.com** - Unable to fetch (unknown error)

**seofirma.eu** - Domain doesn't resolve

**dashgl.gitlab.io/psov2/** - Not yet accessed

**dreamtowncreative.com** - Not yet accessed

**penta.pizza** - Not yet accessed

**codespaced.com** - Not yet accessed

**insaneshit.vercel.app** - Not yet accessed

[www.easycode.ai/flow](http://www.easycode.ai/flow) - Not yet accessed (mentioned as tool but couldn't fetch)

## NOTES FROM DOCUMENT

- **Dioxus + Tauri recommendation:** User recommends for building apps right now. Dioxus described as "much better version of electron and react native" for native apps (mobile, desktop, web)
- **BravoApps.dev** - Confirmed as Shopify apps platform
- **Beckettoliphant.com** - Noted as personal website with cool content
- **Document also included:** Extensive list of data visualization tools, open data platforms, and specialized analysis software (see Repository/Library section above)
